

Everyone Counts

The U.S. Constitution requires that everyone living in the United States — regardless of age, race, ethnicity, or citizenship — is counted every ten years.

It's About Our Voice

The Census affects the number of members of Congress that get to represent Pennsylvania. The more people that represent our communities, the more political power we have.

Kids and Babies Count Too

Children ages 0-5 are undercounted by the census at a higher rate than any other age group. This results in fewer resources for programs that are essential to our children's healthy development like Head Start, CHIP, and WIC.

Protects Important Programs

The Census determines how an estimated \$26.8 billion a year in federal funding is distributed to Pennsylvania for critical public services and health care programs, like WIC, Medicare, TANF, and SNAP.

The Census is Safe and Secure

By law, information collected by the Census cannot be shared or used against you in any way.

It's Our Responsibility

If everyone isn't counted, our communities could lose billions of dollars for important services. Ten years is a long time to wait for another chance.

You Count. They Count. We Count.
